Professional Summary

Skilled electrical professional with extensive hands-on experience in troubleshooting, repairing, and maintaining electrical systems. Strong emphasis on collaborative work and delivering impactful results. Known for adaptability, reliability, and proficiency in using diagnostic tools, interpreting blueprints, and adhering to safety protocols. Highly valued for precision, problem-solving abilities, and effective communication within teams. Experienced with installing, maintaining, and repairing electrical systems, ensuring optimal performance. Utilizes advanced troubleshooting techniques to diagnose and fix electrical issues promptly. Track record of adhering to safety standards and regulatory compliance in all electrical tasks.

Skills

- Proficient in electrical maintenance and installations
- Electrical testing
- Wiring
- Low-voltage Systems
- Transformer maintenance
- Motor Controls
- HVAC systems
- Conduit Bending
- Diagnosing and repairing electrical failures
- Switchgear Maintenance
- Preventive maintenance on systems and equipment
- Power Distribution
- Electrical installation
- High voltage systems
- Equipment maintenance and repair
- Panel Building
- Electrical component testing
- Quality testing
- Electrical malfunction inspection
- Schematic Interpretation
- Testing and analysis of electrical control systems
- Transformer Maintenance
- AC / DC power and control systems
- Fault tracing
- Repairing electrical systems
- Licensed Electrician
- Installing electrical components
- Electrical testing knowledge
- New system installations

Work History

01/2023 - 2024

Maintenance Electrical Technician

Eusbett Hotel Limited

- Ensuring reliability and safe operation of electrical systems
- Breakdowns
- Inspections and testing
- Preventive maintenance on systems and equipment
- Diagnosing and repairing electrical failures
- Electrical Installation

01/2018 - 01/2022

Casual Worker

VRA NEDCO

- Involved in the operational activities as part of the preventive maintenance team to execute various tasks including risk assessment, thorough visual leakage inspections of HV and LV lines and Transformers
